

Business Operations Guide

NorthStar Security - Operational Playbook

1. Purpose of This Guide

This guide explains how to run NorthStar Security operationally, day-to-day, week-to-week, and month-to-month.

It covers:

- Service delivery
- Reporting
- Training
- Client management
- Evidence handling
- Renewal workflow

This is the operator manual and working project blueprint for the business.

2. Core Operating Rhythm

Daily

- Check the simulation inbox for client replies.
- Review any click notifications.
- Confirm training completions.
- Update client notes if anything relevant happens.

Weekly

- Review all active clients.
- Ensure training reminders have gone out.
- Check for overdue evidence.
- Update the internal decisions log if needed.

Monthly

- Deliver simulation.
 - Process click data.
 - Assign micro-training.
 - Generate monthly report.
 - Generate leadership summary.
 - Package evidence.
 - Send report and evidence to client.
 - Update renewal status.
-

3. The NorthStar Service Model

3.1 What You Deliver

NorthStar delivers four things every month:

1. Phishing Simulation
2. Micro-Training for Clickers
3. Monthly Human-Risk Report
4. Leadership Evidence Package

Everything else supports these four pillars.

4. Monthly Delivery Workflow

This is the exact sequence to follow each month.

Step 1 - Run the Simulation

- Choose template.
- Deliver to client list.
- Monitor delivery.
- Collect click data.

Tools used:

- Simulation templates
- Delivery engine

Step 2 - Process Click Data

For each click:

- Identify user.
- Identify department.
- Mark repeat clickers.
- Log click in client notes.

Outputs:

- Click list
- Repeat clicker list
- Department breakdown

Step 3 - Assign Micro-Training

For each clicker:

- Assign training module.
- Send training link.
- Track completion.
- Send reminders.

Outputs:

- Training completion data
- Repeat clicker escalation list

Step 4 - Generate Monthly Report

Use:

- report-cover-page.md
- leadership-summary-template.md
- report-notes-internal.md

Sections:

1. Executive Summary
2. Key Metrics
3. Department Breakdown
4. Risk Score
5. Simulation Summary
6. Training Summary
7. Recommendations
8. Evidence Package

Step 5 - Generate Evidence Package

Use:

- evidence-package-cover.md

Include:

- Simulation evidence
- Training evidence
- Corrective action logs

This is what insurers care about.

Step 6 - Deliver to Client

Send:

- Monthly report as PDF or Markdown
- Evidence package
- Leadership summary

Follow up:

- Ask if they want a 10-minute walkthrough.
 - Log any feedback.
-

5. Client Management

5.1 Onboarding

Use the `Client_Template` folder.

Steps:

- Create new folder from template.
- Add client contacts.
- Add simulation schedule.
- Add training preferences.
- Add any special notes.

5.2 Client Notes

Every client has a `client-notes.md` file.

Update it with:

- Key contacts
- Risk areas
- Repeat clickers
- Special requests
- Renewal status

5.3 Renewal Workflow

Run this every 90 days:

1. Review last 3 months of reports.
 2. Review evidence completeness.
 3. Prepare renewal summary.
 4. Send renewal email.
 5. Update renewal status.
-

6. Quality Standards

Tone

- Plain-English
- No jargon
- No shaming
- Focus on improvement
- Highlight wins

Reporting

- Always double-check names.
- Always verify click counts.
- Always verify training completion.
- Always check department names.

Evidence

- Must be complete.
 - Must be accurate.
 - Must be stored in Canada.
 - Must be retained for 12 months.
-

7. Internal Tools and Files You Use

From Business_Operations

- Offer sheet
- Pricing
- Service menu
- Discovery questionnaire
- Scope template
- Policy boundaries
- Onboarding checklist
- Renewal workflow
- Website copy

- Outreach sequences

From Delivery_Engine

- Monthly campaign workflow
- Tool stack notes
- Campaign examples
- Micro-training scripts
- Completion evidence template
- Risk scoring model
- Dashboard guide
- Evidence collection guide

From SwarmCommand_Engine

- Drafting agents for writing
 - Scoring agents for metrics
 - Workflow agents for automation
 - Workflows for process clarity
-

8. Operator Checklist

Before Simulation

- Template selected
- Client list verified
- Schedule confirmed

After Simulation

- Clicks processed
- Training assigned
- Notes updated

Before Reporting

- All data verified
- All training completed
- Evidence collected

Before Sending

- Report reviewed
 - Evidence attached
 - Leadership summary included
-

9. How to Scale This Business

Add Clients

- Use Client_Template.
- Keep onboarding simple.
- Deliver consistently.

Add Operators

- Give them this guide.
- Give them the workflows.
- Give them the templates.

Add Automation

- Implement SwarmCommand agents.
 - Automate scoring.
 - Automate drafting.
 - Automate scheduling.
-

10. NorthStar Operating Philosophy

- Simple beats complex.
 - Plain-English beats technical.
 - Evidence beats opinion.
 - Consistency beats brilliance.
 - Monthly rhythm beats ad-hoc chaos.
-

Project Blueprint Status

This document is the current working project blueprint for NorthStar Security operations. Update it whenever the operating model changes.
