

Idea Parking Lot

Purpose: capture new product, agent, SaaS, marketplace, nonprofit, or platform ideas without letting them interrupt the 30-day revenue push.

Rule

Ideas are allowed. New builds are not.

For the next 30 days, any new idea goes here as a one-line entry. No folder, no spec, no code, no research session, no domain buying, no new stack.

Current Primary Focus

```text

NorthStar Inbox Shield cashflow path:

use the working LangGraph / Grok / eval-harness demo to win one small paid freelance contract within 30 days.

```

Active Exceptions

Only these are allowed during the 30-day window:

1. Paid client work.
2. Inbox Shield proposal/demo support.
3. Tiny fixes needed to keep the demo proof passing.
4. Scheduled review of this file.

Monthly Review Rule

Review this file once per month. An idea can move out only if:

- It still feels useful after 30 days.
- It supports NorthStar, Social Architect, or SwarmCommand directly.
- It has a clear customer/funding path.
- It does not create a new build before revenue.

Parking Lot

Date	Idea	Notes	Status
------	------	-------	--------

--- --- --- ---

2026-05-22	AI market-pusher / project-to-buyer lead miner	Agent that finds companies likely
------------	--	-----------------------------------

to need a finished project and routes outreach. Overlaps with original agentic bidding idea.

Parked until revenue path is proven. | parked |

| 2026-05-22 | Iron Grid sponsor-token layer | Utility-only fan sponsorship tokens, not betting/payouts. Needs legal/payment review before any launch. | parked |

| 2026-05-22 | Social Architect BC youth-resource ecosystem | Mission project connected to Freedom's Door; long-term priority funded by future revenue. No new build during 30-day cashflow push. | parked |
